The Merchants' cards and others similar, so freely used during the War of the Rebellion and now commonly called "War Tokens" had their origin I believe in 1858, when an electrotype or leaden piece, copied after the "flying eagle"—the new small cent—first appeared. It was followed in 1859 by an issue of the Marshall House, Alexandria, Va.—where Ellsworth was shot two years later. It is by Lovett of Phila. and has the head of Liberty, which was used on his famous Confederate Cent. Lovett's own card, dated 1860 has the same profile. The head is subsequently used on an undated card of the Magnolia Hotel, Phila., with the letters R(ober) L(ovett) beneath truncation. It may be interesting to collectors to learn the proportion of dates in the following representative collection, showing that some are ante-bellum, while the greatest emission—over $\frac{5}{8}$ of them—was in 1863, the third year of the war: 1860 2, 1861 10, 1862 4, 1863 198, 1864 18, n. d. 66, total 298.

- 15 War or Rebellion Tokens. Merchants' names, towns in R. I., Conn., N. York, N. Jersey, Penna., W. Va., Ohio, Ind., Mich., Wis. and Ill. A very general asst. from each State, and a good collection, includes 2 of Yankee Robinson, 1 with bust in profile r. Mostly fine, 4 are holed.

No further Government issue of Copper until that struck by order of the Viceroy Calleja (1814), in the time of Ferd. VII. See *Am. Jour. Numismatics*, July, 1902, p. 29, for reason.

The suspension of the coinage of copper coins at the mints in Mexico, from the time of Chas. and Joanna to Ferd. VII, a period of about 280 years, is something to think of from several interesting points, and there are no other copper coins from any of the 13 Spanish-American mints, which were in operation up to the reign of Ferd. VII, all of which suspended between the years 1816 and 1826,

Cuzco in South Peru being the last to produce, whose coins are dated 1826, though Spanish coins continued to be the standard for many years thereafter. It may be truly said that Spain with its rich and matchless silver mines in the Americas, was a moneyer for the whole world; her coins were "current everywhere" for a period of at least 130 years, ending about 1860. It is within my own memory when the subsidiary silver coins from Spanish-American mints were more plentiful in circulation in Boston than our own coinage.

THE STATES OF MEXICO.

Dr. Bastow appears to have taken special care and interest in collecting die varieties, and was doubtless very critical. His numerous notes, found with the coins, furnish satisfactory evidence of this, and it is believed that in the greater portion—if not all—of the lots that follow, they are here assembled on these lines, and as found in his cabinet. While here and there an occasional glance or comparison has verified this conclusion, I have not examined them with the view of eliminating duplicates, but submit them as received.

- 55 *Chihuahua*. 1833, '35, '46, '55, '60, '61, '65, '66, $\frac{1}{4}$ Reals. Mostly fair and good. 25

- 57 1858 "Republica Mexicana" Eagle. $\frac{1}{2}$ DURANGO 1858 | $\frac{1}{4}$. Very rare. Not in my edition of Scott's Cat. Also $\frac{1}{4}$ do. Lib. cap, and issues of 1860, '66 (2 types), '72, the latter with "Sufragio Libre" and rare, v. fair to fine. 6
- 58 Other Quarter Rls. 1858 (4), 1860 (6), 1866 (5, two types). Fair to v. good. 1872 (3). Very fine. 18

- 62 Others 1828-35. The small Octavos (9), 1828-36 Quartos (27). Mostly fair and good. 36

- 63 Others. 1860 Med. Oct. (5), 1856-62 Octavos. Some with "Estado" others "Departamento" (29). Fair to good. 34
- 64 1858, '59, '60, '62. The large Cuartilla, "Estado" and "Departamento." Good to about fine (12). Late issues, and as some are subsequent to other State issues, and all wretched in execution, it is possible they were unauthorized, yet the boldness of dating would seem to be evidence that they were at least tolerated. Med. Oct. 1870, '71, '81; Oct. 1865, '78, '81 (6). 18
- 65 **San Luis Potosi.** 1830 $\frac{1}{4}$ Real, 1831 $\frac{1}{8}$ do. (very rare). "Mexico Libre" 1862 $\frac{1}{4}$ do. "Republica Mexicana" 1867 $\frac{1}{4}$ Lib. cap. Fair, good and fine. 4
- 66 Others. $\frac{1}{4}$ Rls. 1828, '29, '30, '32, '59, '60 (17), 1862 2nd coinage (7), 1867 3rd do. (7). Fair to good. 31

- 68 Other $\frac{1}{4}$ Reals. 1847, '48 (2), '59 (10), '61 (10), '62 (13), '63 (17), '64 (24). Fair to fine. 77
- 69 Others. 1848 (2), '59 (9), '61 (12), '62 (12) '63 (10), '64 (10), '65 (10), '66 (10). Fair to fine. 75
- 70 Others. 1859 (9), '61 (13), '62 (8), '63 (12), '64 (12), '65 (12), '66 (12). Fair to fine. 78
- 71 Others. 1863, '64, '65, '66. Fairly asst. in each year. 104
- To accept the theory advanced in my note preceding lot 55, it would seem that the Sinaloa mint is without a parallel. They must have rudely pounded imperfectly constructed dies, which were constantly being replaced by new ones, and judging by the apparent excess of issue over all other Provincial mints, the demand for their copper coins was very great.
- 72 **Sonora.** Cuartillas 1859 (5), '61 (3), '62, '63. Fair to about fine. 10
- 73 **Zacatecas.** Octavos 1830-63 (10), Cuartillas 1825-63 (15). Differing dates of each. V. fair to good. 25
- 74 Others. Octavos, 8 dif. dates (10), Cuartilla, 10 dif. dates (21). Barely fair to good. 31
- 75 Others. Oct. 7 dif. dates (13), Quart. 7 dif. dates (30). Barely fair to good. 43

A WORD AS TO CONDITION.

A few of the pieces struck between the years 1814 and 1821 are fairly executed; they are better however from 1829 to 1832 and 1841, '42, '61, '63; in all other years — patterns excepted — they are indifferently rendered. These

remarks apply to the productions of the M mint, which work continues superior to that of the provincial or branch mints, which are still in operation.

Of the State coinages, Guanaxuato ranks a little above the others, with Zacatecas next, and while Sinaloa has some fair work in its early dates, it drops finally to the lowest grade of die cutting.

The Municipal issues and those of merchants, Haciendas and Ranchos (or farms), are for the greater part from rudely constructed dies, and imperfectly struck.

Therefore, crude or defective work however well preserved, is difficult to rate, or grade, to do justice to the piece and meet the expectations of the purchaser.

Nevertheless I bespeak special interest for all of these classes which I have selected for more particular notice as to their irregularities. They may be admired for their originality and quaintness, and for the necessity which brought them into existence, for convenience in small bartering, in places remote from commercial centres.

Whatever conjectures have been made in the past, regarding the letters T. C. I am now inclined to venture the opinion, that C. may be an abbreviation for Chilpancingo in the State of Guerrero. The T. can be interpreted for Tanteo,

the Spanish for 'a number or set of Tokens,' the stamp thus indicating pieces, more or less numerous, issued by the place of which the name or initial follows. Valuation and Redeemable however are other definitions of the word, and may be more acceptable. At a little later period, TANTEO is found unabbreviated on very many copper and brass pieces, issued in various towns throughout Mexico. This more than all other points which I have considered as evidence, leads me to my present conclusions.
